

6050 Marshall Court, Arvada, CO 80003

Property Description: This mid-century ranch was built in 1954 located in Old Town Arvada. This home has been extensively renovated with modern updates while still preserving its character. This property includes 4 beds, 3 baths, and includes a main level and basement level. With a total of 1,926 square feet on a 9,496 square foot lot, this properties basement and main level are both 963 square feet.

Key Property Highlights:

- Built in 1954
- 4 bedrooms, 3 baths
- 1,926 total square feet
- 963 square foot main level
- 963 square foot basement level
- 9,496 square foot lot

Asking Price (Zillow.com, April 2026): \$679,900

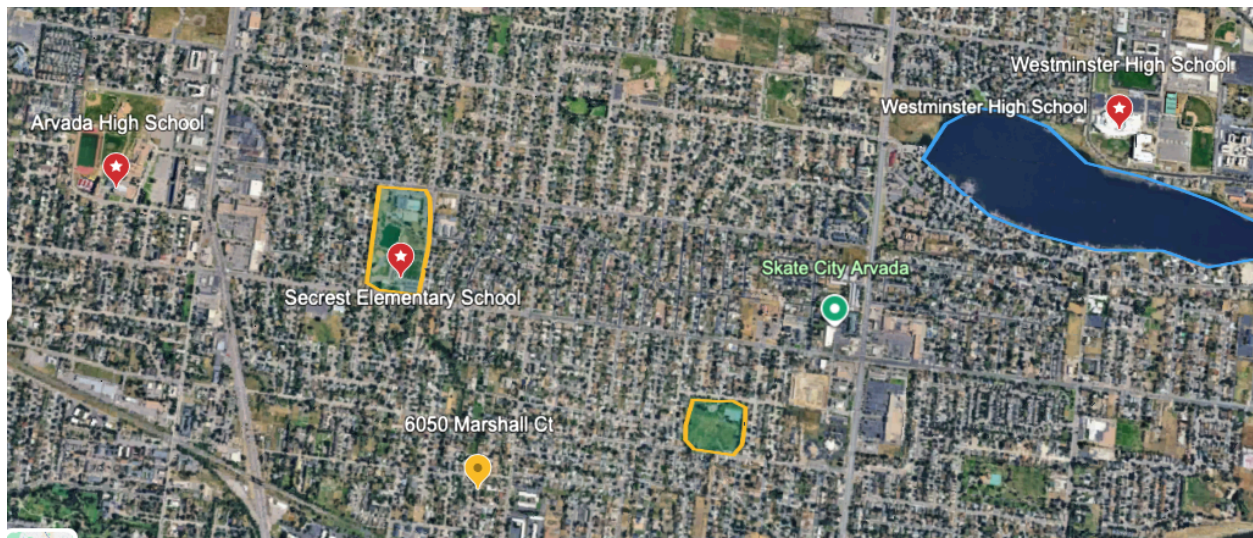

Calculated Price: \$595,164.66 (~\$595,000)

Calculated Price Explanation: Our calculations indicate that the value of this home is approximately \$595,000, which is 14.25% lower than the current asking price of \$679,900. This suggests the home may be overpriced based on the key property characteristics of year built, above ground square footage, basement size and lot size.

Home report

Price Difference Explanation: The difference between asking price and calculated price could be influenced by the current market as well as the location. Two nearby homes are priced approximately 10% below their estimated values, which could suggest different pricing strategies.

While this home appears to be overpriced compared to nearby homes, recent renovations and its location could justify a higher listing price. This neighborhood is also in Old Town Arvada, with two high schools, one elementary school, and two local parks and a large lake. This property also resides near major intersections including Wadsworth and HWY 76.

6050 Marshall Court, Arvada, CO 80003 Local Amenities

Suggested Price Offer: Our suggested price offer is \$615,000 which is above the estimated value but considers recent renovations and its current high price point. The price offer of \$615,000 is competitive for the neighborhood and allows room for negotiation.

Max Price Recommendation: The maximum price I would recommend paying for this home is \$635,000. This price is above the estimated value but considers the location and recent renovations. A price above this amount could be overpriced considering the home's value.

Off the record notes:

For this analysis I used Excel, Zillow.com, and Google Earth.

Below are details about the Excel Analysis I conducted.

Model 5 Pricing for Marshall Court House		Model 5 Pricing for Comparison House #1		Model 5 Pricing for Comparison House #2	
6050 Marshall Court, Arvada, CO 80003		7235 W 61st Avenue, Arvada, CO 80003		6840 W 60th Avenue, Arvada, CO 80003	
Price:	\$595,164.66	Price:	\$795,792.42	Price:	\$827,258.39
Listing Price:	\$679,900	Listed Price:	\$700,000	Listed Price:	\$750,000
Difference:	\$84,735.34	Difference:	(\$95,792.42)	Difference:	(\$77,258.39)
Percentage Difference	14.24%	Percentage Difference:	-12.04%	Percentage Difference:	-9.34%
Result:	OVERPRICED	Result:	UNDERPRICED	Result:	UNDERPRICED

Neighborhood Market Comparisons:

I took two other houses on sale that are located on the same block and compared their calculated prices vs. listing prices to see if they are under or overpriced. I used my Model 5 regression formula to calculate the price for each house and found the listing price on Zillow.com. I also calculated the percent difference for all three houses, with an average difference of -2.38%. I also calculated the average price difference between the two comparison houses since they were both underpriced, which was an average of -10.69%.

Suggested Price Analysis	
Selling @ calculated price with 97% selling	\$577,309.72
Suggested Price	\$613,571.82
Amount Made after Suggested Price	\$595,164.66
Max Offer	\$632,548.26

Suggested Price Analysis:

I took the calculated selling price of \$595,164.66 and divided it by 0.97 to get my suggested price. Below are some links on the Denver housing market, I am seeing its between 97-99.9% so I decided to use 97%. When dividing the calculated price by 97% I received the total of \$613,571.82. This helped me conclude that the suggested offer price should be \$615,000. I also calculated the max price using a similar strategy, where I divided \$613,571.82 by 0.97 to get the max total of \$632,548.26. The max price shows a 3% difference from the suggested price and reflects a 6.09% difference to the calculated price. The original asking price is 14.25% overpriced, and the average neighborhood house sale price is underpriced by 2.38%. These calculations are based on the current Denver housing market.
